Product Description

international plastics design competition

The Presentation Case Binder is durable, reusable and made from 100% recyclable polypropylene. The case is fully enclosed to protect and store important documents and photos, and comes with a stand so that presentations are portable. The Presentation Binder is perfect for eco-conscious designers, artists and architects, who need large capacity storage and portable presentation.

Why is the product innovative?

The Presentation Case Binder makes for a memorable presentation that is ideal for designers, artists and architects who require large capacity storage and portability for their portfolio. It is an effective presentation tool and economical and eco-friendly leave-behind that will impress your customer and close the deal. A creative solution to present ideas, concepts and designs, the binder is perfect for storing and protecting important documents and photos. Durable and reusable, the binder is made of 100% recyclable polypropylene with no metal rings. The rings are round, injection molded 100% polypropylene and molded as one piece with the binder. The binder can be easily transformed from storage unit to presentation tool when using the unique presentation stand and easy to flip, archival page protectors. Making presentations a breeze, 100% recyclable, polypropylene pages can hold up to 20 pages of artwork sized at an 11" x 17" tabloid page or two 8.5" x 11" doublewide pages. The fully enclosed case snaps securely for convenient storage and is available in a variety of vibrant colors.
