

WING CAPS

from the makers of **Rubbin' Repair**

Self-adhesive

Moldable when warmed

Rigid at racing temperatures

Tough protection

Customizable

Easy application

Eliminates rivets

Affordable

Removable without wing damage

Tough Protection for Whatever the Track Throws at You.

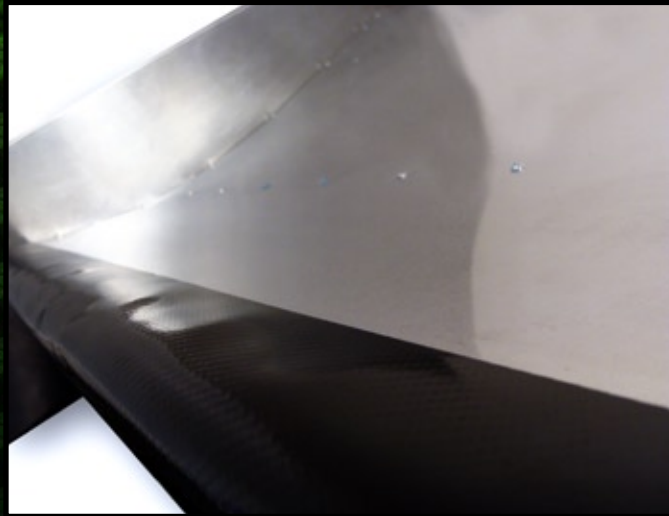

Wing Caps from the makers of Rubbn'Repair can be customized to any size or shape in only a matter of minutes. The wing caps are hard and rigid, but when they are heated, they become soft and moldable. Teams can custom fit wings with protection that stays put even under the hardest racing conditions. Within seconds, the wing caps harden again into a strong, lightweight, protective cap that holds the new shape.

The Look of Carbon Fiber
Strong, Self-Adhesive Backing (No Rivets)
High-Performance Composite Material

Wing Caps are a cost-effective, reliable solution to protect expensive racing equipment. These wing caps are an evolution in protection of sprints, micros, midgets and more.
